Lo Loestrin® Fe is indicated for pregnancy prevention. If you are moderately obese, discuss with your healthcare provider whether Lo Loestrin Fe may be right for you.

Not ready to get pregnant? WE’RE WITH you.

IMPORTANT RISK INFORMATION

WARNING TO WOMEN WHO SMOKE
Do not use Lo Loestrin Fe if you smoke cigarettes and are over 35 years old. Smoking increases your risk of serious cardiovascular side effects (heart and blood vessel problems) from birth control pills, including death from heart attack, blood clots, or stroke. This risk increases with age and the number of cigarettes you smoke.

Please see Important Risk Information throughout and enclosed Brief Summary, including Boxed Warning.

loloestrin.com
Finding the pill that may be right for you.

If pregnancy isn’t part of the plan right now, we get it. In fact, it’s why we’re here. Lo Loestrin® Fe is the only birth control pill that provides effective pregnancy prevention with the lowest amount of daily estrogen (10 micrograms) available.

Want to learn more? Ask your healthcare provider if Lo Loestrin Fe—the #1-prescribed birth control pill by OB/GYNs*—may be right for you.

Quick FACT

Let’s take a closer look.

What is Lo Loestrin Fe?
Lo Loestrin Fe contains a low-dose combination of 2 female hormones. The hormones are an estrogen called ethinyl estradiol and a progestin called norethindrone acetate. Just remember: Birth control pills do not protect you against sexually transmitted diseases, including HIV, the virus that causes AIDS.†

What will your periods be like?
Lo Loestrin® Fe may give women short, lighter periods. Most women found that while taking Lo Loestrin Fe they had a period that lasted less than 2 days per cycle on average.‡ Plus, some women had periods that were lighter than normal.

Will you experience bleeding and spotting?
It’s not uncommon to have some bleeding and spotting between periods. When you first start taking birth control pills, your body may need time to adjust. That adjustment period can take a few months. Approximately half of the women who use Lo Loestrin Fe have unscheduled bleeding or spotting in the first months of use, and the frequency of the bleeding and spotting between periods decreased over time. About one-third of users continue to have unscheduled bleeding or spotting after one year of use. If the unscheduled bleeding or spotting is heavy or lasts for more than a few days, you should discuss this with your healthcare provider.¶

What if you miss a period?
It is not uncommon to miss a period while on birth control pills. In a clinical study, about 50% of women experienced a missed period by the end of one year. What does that mean? If you miss a period, you could be pregnant. However, some women miss their periods or have light periods on birth control pills, even when they are not pregnant. Contact your healthcare provider if you think you might be pregnant, if you miss a period and have not taken your pills every day, or if you miss two periods or more in a row.¶

IMPORTANT RISK INFORMATION (continued)

What else should I know about taking Lo Loestrin Fe?
Treatment with Lo Loestrin Fe should be stopped if you have a blood clot, and at least 4 weeks before and through 2 weeks after major surgery. You should not take Lo Loestrin Fe any earlier than 4 weeks after having a baby or if you are breastfeeding. If you experience yellowing of the skin or eyes due to problems with your liver, you should stop taking Lo Loestrin Fe. If you are pre-diabetic or diabetic, your doctor should monitor you while using Lo Loestrin Fe and should evaluate you if you have any significant change in headaches or irregular menstrual bleeding.

Please see Important Risk Information throughout and enclosed Brief Summary, including Boxed Warning.

Lo Loestrin Fe

† Survey respondents could choose from the following to indicate their interest in an oral contraceptive (OC) with the lowest amount of daily estrogen: extremely interested, very interested, somewhat interested, and not at all interested. The 93% value represents those who answered extremely interested, very interested, and somewhat interested.

‡ Source: Online survey conducted by Harris Poll on behalf of Allergan USA, Inc., between July 7–14, 2014 among 1005 U.S. women age 18–45 currently using oral contraceptives (OCs) or considering use in the next 6 months.

IMPpORTANT RISK INFORMATION (continued)

Who should not take Lo Loestrin Fe?
Do not use Lo Loestrin Fe if you have kidney, liver, or adrenal disease because this could cause serious heart and health problems, or if you have or have had blood clots, history of heart attack or stroke, high blood pressure that medicine cannot control, breast cancer or any cancer that is sensitive to female hormones, liver disease or liver tumors, unexplained bleeding from the vagina, or if you are or may be pregnant.

Getting to know your pill pack.

First, decide what time of day to take your pill. It’s important that you remember to take your pill at the same time every day and in the order as directed on your pill pack—just follow the arrows.

Each Lo Loestrin Fe pill pack has 24 “active” blue pills (with hormones) and 2 “active” white pills (with hormones) for Weeks 1, 2, 3, and part of Week 4. The pill pack also has 2 “reminder” brown pills (without hormones) for the last part of Week 4.

Like other birth control pills, you take a Lo Loestrin Fe pill every day, for 28 days, until the pack is empty. Then you start a new pill pack. The brown pills are there to keep you in the habit of taking a pill every day and to help remind you when it’s time to start a new pack.¹

Your Lo Loestrin Fe pill pack¹

![Image of pill pack]

24 blue active pills:
1 milligram norethindrone acetate (progestin) and 10 micrograms ethinyl estradiol (estrogen)

2 white active pills:
10 micrograms ethinyl estradiol (estrogen)

2 brown reminder pills:
75 milligrams ferrous fumarate (iron)

If you have more questions about how to take Lo Loestrin Fe, see the enclosed Brief Summary or talk to your healthcare provider.

Remember: If you miss pills you could get pregnant. This includes starting the pill pack late. The more pills you miss, the more likely you are to get pregnant.¹

IMPORTANT RISK INFORMATION (continued)

What are the possible side effects of Lo Loestrin Fe?
The most common side effects reported by women taking Lo Loestrin Fe in a study were nausea/vomiting, headache, spotting or bleeding between menstrual periods, painful menstruation, weight change, breast tenderness, acne, abdominal pain, anxiety, and depression.

Birth control pills do not protect you against any sexually transmitted disease, including HIV, the virus that causes AIDS.

Please see Important Risk Information throughout and enclosed Brief Summary, including Boxed Warning.
We offer savings.

Interested in a Lo Loestrin® Fe Savings Card? Most eligible patients may be able to save on their Lo Loestrin Fe prescription!*

How to save:

1. Before visiting your pharmacy, you must activate your card. Text ‘Lo Loestrin Fe’ to 75186, visit LoLoestrinFeSavings.com or call 1.877.395.8433.

2. Once activated, your card is good for up to 13 one-month prescription fills OR up to 4 three-month prescription fills before the program expires on June 30, 2018.

3. Eligible patients may pay as little as $25* for each of up to 13 one-month prescription fills OR each of up to four (4) three-month prescription fills. Check with your pharmacist for your copay discount.

4. If your primary insurance rejects for prior authorization, step edit, or NDC block, you may still be considered eligible for this program. If you are eligible,* your pharmacist can continue to process the secondary transaction so you can receive your discount.

5. Be sure to bring your Lo Loestrin® Fe Savings Card to the pharmacy each time you fill your Lo Loestrin® Fe prescription.

* Depending on insurance coverage, eligible patients may pay as little as $25 for each of up to 13 one-month Lo Loestrin® Fe prescription fills OR each of up to four (4) three-month Lo Loestrin® Fe prescription fills. Check with your pharmacist for your copay discount. Maximum savings limits apply; patient out-of-pocket expense will vary. Offer not valid for patients enrolled in Medicare, Medicaid, or other federal or state healthcare programs. Please see Program Terms, Conditions, and Eligibility Criteria on card, page 7 of this brochure, or at LoLoestrinFeSavings.com.

Please see Important Risk Information throughout and enclosed Brief Summary, including Boxed Warning.

Questions?

If you have questions about the Lo Loestrin® Fe Savings Program, simply call us at 1.855.439.2817.

Mail-order patients:

If you fill your prescription through a mail-order pharmacy, or if you are unable to have your card processed at your local pharmacy, please submit:

1. A photocopy of the front and back of your Lo Loestrin Fe Savings Card
2. Your original proof of purchase (original pharmacy receipt with your name and address, pharmacy name, product name, prescription numbers, NDC number, date filled, quantity, and price) and a photocopy of the front and back of your insurance card
3. Your date of birth
4. Mail all of the information to:
   Lo Loestrin® Fe Savings Program
   c/o ConnectiveRX
   PO Box 7017
   Bedminster, NJ 07921-9918

Please allow 6-8 weeks to receive your reimbursement. Reimbursement requests must be postmarked by June 30, 2018. Reimbursements are subject to Program Terms, Conditions, and Eligibility Criteria.

Program Terms, Conditions, and Eligibility Criteria: 1. This offer is good for use only with a valid prescription for Lo Loestrin® Fe (norethindrone acetate and ethinyl estradiol tablets, ethinyl estradiol tablets and ferrous fumarate tablets) at the time the prescription is filled by the pharmacist and dispensed to the patient. 2. Depending on your insurance coverage, eligible patients may pay as little as $25 for each of up to thirteen (13) one-month prescription fills OR each of up to four (4) three-month prescription fills. Check with your pharmacist for your copay discount. Maximum savings limits apply; patient out-of-pocket expense will vary. 3. This offer is not valid for use by patients enrolled in Medicare, Medicaid, or other federal or state programs (including any state pharmaceutical assistance programs), or private indemnity or HMO insurance plans that reimburse you for the entire cost of your prescription drugs. Patients may not use this offer if they are Medicare-eligible and enrolled in an employer-sponsored health plan or prescription drug benefit program for retirees. This offer is not valid for cash-paying patients. 4. Each card is valid for up to thirteen (13) prescription fills of a 28-day supply each OR up to four (4) prescription fills of an 84-day supply each. Offer applies only to prescriptions filled before the program expires on 6/30/18. 5. Allergan reserves the right to rescind, revoke, or amend this offer without notice. 6. Offer good only in the USA, including Puerto Rico, at participating retail pharmacies. 7. Void if prohibited by law, taxed, or restricted. 8. This card is not transferable. The selling, purchasing, trading, or counterfeiting of this card is prohibited by law. 9. This card has no cash value and may not be used in combination with any other discount, coupon, rebate, free trial, or similar offer for the specified prescription. 10. This offer is not health insurance. 11. This card expires June 30, 2018. 12. By redeeming this card, you acknowledge that you are an eligible patient and that you understand and agree to comply with the terms and conditions of this offer.

For questions about the program, including savings on mail-order prescriptions, please call 1.855.439.2817.
Get to know Lo Loestrin Fe.

To find out more about the only birth control pill with just 10 micrograms of daily estrogen, visit loloestrin.com.

Lo Loestrin Fe is indicated for pregnancy prevention. If you are moderately obese, discuss with your healthcare provider whether Lo Loestrin Fe may be right for you.

IMPORTANT RISK INFORMATION

WARNING TO WOMEN WHO SMOKE

Do not use Lo Loestrin Fe if you smoke cigarettes and are over 35 years old. Smoking increases your risk of serious cardiovascular side effects (heart and blood vessel problems) from birth control pills, including death from heart attack, blood clots, or stroke. This risk increases with age and the number of cigarettes you smoke.

Please see Important Risk Information throughout and enclosed Brief Summary, including Boxed Warning.

Lo Loestrin® Fe
(norethindrone acetate and ethinyl estradiol tablets, ethinyl estradiol tablets and ferrous fumarate tablets)
Brief Summary of FDA-Approved Patient Labeling

WARNING TO WOMEN WHO SMOKE
Do not use Lo Loestrin Fe if you smoke cigarettes and are over 35 years old. Smoking increases your risk of serious cardiovascular side effects (heart and blood vessel problems) from birth control pills, including death from heart attack, blood clots or stroke. This risk increases with age and the number of cigarettes you smoke.

Birth control pills help to lower the chances of becoming pregnant when taken as directed. They do not protect against HIV infection (AIDS) and other sexually transmitted diseases.

What is Lo Loestrin Fe?
Lo Loestrin Fe is a prescription birth control pill. It contains two female hormones, an estrogen called ethinyl estradiol, and a progestin called norethindrone acetate.

Who should not take Lo Loestrin Fe?
Your healthcare provider will not give you Lo Loestrin Fe if you have:
- Ever had blood clots in your legs (deep vein thrombosis), lungs (pulmonary embolism), or eyes (retinal thrombosis)
- Ever had a stroke
- Ever had a heart attack
- Certain heart valve problems or heart rhythm abnormalities that can cause blood clots to form in the heart
- An inherited problem with your blood that makes it clot more than normal
- High blood pressure that medicine can’t control
- Diabetes with kidney, eye, nerve, or blood vessel damage
- Ever had certain kinds of severe migraine headaches with aura, numbness, weakness, or changes in vision
- Ever had breast cancer or any cancer that is sensitive to female hormones
- Liver disease, including liver tumors

Also, do not take birth control pills if you:
- Smoke and are over 35 years old
- Are or suspect you are pregnant
- Are allergic to anything in Lo Loestrin Fe

Birth control pills may not be a good choice for you if you have ever had jaundice (yellowing of the skin or eyes) caused by pregnancy, also called cholestasis of pregnancy.

Tell your healthcare provider if you have ever had any of the above conditions (your healthcare provider may recommend another method of birth control).

What else should I know about taking Lo Loestrin Fe?
Birth control pills do not protect you against any sexually transmitted disease, including HIV, the virus that causes AIDS.

Do not skip any pills, even if you do not have sex often.

If you miss a period, you could be pregnant. However, some women miss periods or have light periods on birth control pills, even when they are not pregnant. Contact your healthcare provider for advice if you:
- Think you are pregnant
- Miss one period and have not taken your birth control pills every day
- Miss two periods in a row

Birth control pills should not be taken during pregnancy. However, birth control pills taken by accident during pregnancy are not known to cause birth defects.

You should stop Lo Loestrin Fe at least four weeks before you have surgery and not restart it until at least two weeks after the surgery, due to an increased risk of blood clots.

If you are breastfeeding, consider another birth control method until you are ready to stop breastfeeding. Birth control pills that contain estrogen, like Lo Loestrin Fe, may decrease the amount of milk you make. A small amount of the pill’s hormones pass into breast milk.

Tell your healthcare provider about all medicines and herbal products that you take. Some medicines and herbal products may make birth control pills less effective, including:
- barbiturates
- bosantan
- carbamazepine
- felbamate
- griseofulvin
- oxcarbazepine
- phenytoin
- rifampin
- St. John’s wort
- topiramate

Consider using another birth control method when you take medicines that may make birth control pills less effective.

Birth control pills may interact with lamotrigine, an anticonvulsant used for epilepsy. This may increase the risk of seizures, so your healthcare provider may need to adjust the dose of lamotrigine.

If you have vomiting or diarrhea, your birth control pills may not work as well. Use another birth control method, like a condom and spermicide, until you check with your healthcare provider.

If you are scheduled for any laboratory tests, tell your healthcare provider that you are taking birth control pills. Certain blood tests may be affected by birth control pills.

What are the most serious risks of taking Lo Loestrin Fe?
Like pregnancy, birth control pills increase the risk of serious blood clots, especially in women who have other risk factors, such as smoking, obesity, or age greater than 35.

It is possible to die from a problem caused by a blood clot, such as a heart attack or a stroke.

Some examples of serious blood clots are blood clots in the:
- Legs (deep vein thrombosis)
- Lungs (pulmonary embolus)
- Eyes (loss of eyesight)
- Heart (heart attack)
- Brain (stroke)

A few women who take birth control pills may get:
- High blood pressure
- Gallbladder problems
- Rare cancerous or noncancerous liver tumors

All of these events are uncommon in healthy women.

Call your healthcare provider right away if you have:
- Persistent leg pain
- Sudden shortness of breath
- Sudden blindness, partial or complete
- Severe pain or pressure in your chest
- Sudden, severe headache unlike your usual headaches
- Weakness or numbness in an arm or leg, or trouble speaking
- Yellowing of the skin or eyeballs

What are the common side effects of birth control pills?
The most common side effects of birth control pills are:
- Spots or bleeding between menstrual periods
- Nausea
- Breast tenderness
- Headache

These side effects are usually mild and usually disappear with time.

Less common side effects are:
- Acne
- Less sexual desire
- Bloating or fluid retention
- Blotchy darkening of the skin, especially on the face
- High blood sugar, especially in women who already have diabetes
- High fat (cholesterol, triglyceride) levels in the blood
- Depression, especially if you have had depression in the past. Call your healthcare provider immediately if you have any thoughts of harming yourself
- Problems tolerating contact lenses
- Weight gain

This is not a complete list of possible side effects. Talk to your healthcare provider if you develop any side effects that concern you. You may report side effects to the FDA at 1-800-FDA-1088.

No serious problems have been reported from a birth control pill overdose, even when accidentally taken by children.

Do birth control pills cause cancer? Birth control pills do not seem to cause breast cancer. However, if you have breast cancer now, or have had it in the past, do not use birth control pills because some breast cancers are sensitive to hormones.

Women who use birth control pills may have a slightly higher chance of getting cervical cancer. However, this may be due to other reasons such as having more sexual partners.

What should I know about my period when taking Lo Loestrin Fe?
When you take Lo Loestrin Fe you may have bleeding and spotting between periods, called unscheduled bleeding. Approximately half of the women who use Lo Loestrin Fe have unscheduled bleeding or spotting in the first months of use, and about one-third of users continue to have unscheduled bleeding or spotting after one year of use. If the unscheduled bleeding or spotting is heavy or lasts for more than a few days, you should discuss this with your healthcare provider.

What if I miss my scheduled period when taking Lo Loestrin Fe?
It is not uncommon to miss your period. However, if you go two or more months in a row without a period, or you miss your period after a month where you did not take all your pills correctly, call your healthcare provider because you may be pregnant. Also notify your healthcare provider if you have symptoms of pregnancy such as morning sickness or unusual breast tenderness. Stop taking Lo Loestrin Fe if you are pregnant.

Need More Information?
- This summary contains important risk information about Lo Loestrin Fe. The information provided here is not comprehensive, and is not meant to take the place of your healthcare provider’s instructions. To learn more, talk about Lo Loestrin Fe with your healthcare provider or pharmacist.
- The FDA-approved product labeling can be found at www.loloestrin.com or call 1-800-433-8871.
